SBG Accountants & Business Advisors - Australian Accountants Directory
SBG Accountants & Business Advisors was established over 40 years ago to provide traditional accounting and taxation services to small business owners. Over the years they have responded to the needs of their clients and they now offer a complete range of accounting, taxation and business advisory services. In fact, they are now a full financial services firm that offers financial planning and wealth creation services through one of their affiliate partners. SGB Accountants & Business Advisors offers a wide range of services including accounting taxation & GST, cloud accounting, benchmarking, bookkeeping, insurances, loans & mortgages, estate planning, business planning, business coaching, management coaching, marketing, financial planning and self-managed super funds. Originally situated in the Southbank precinct, SGB relocated in 2009 to new offices in Market Street on the fringe of the Melbourne CBD. Courtesy of a high level of client referrals they are now categorised as a small to mid-sized accounting firm with around 10 staff. As such, they are large enough to handle highly technical tax and accounting issues and have developed specialist divisions within the firm including SMSF's. At the same time, they are small enough to guarantee their clients personal service and immediate access to all staff.
